

Honour Boards Discussion

The Modbury Bowling Club has become the leading club in South Australia for innovation and progression. This has been done in many ways, with many clubs coming to us for advice. We must continue this trend and make the Modbury Bowling Club more significant and better. To do this, we need to continue being innovative and progressive.

The Modbury Bowling Club has a great tradition and history that should never be lost, so we must ensure our history is maintained and updated effectively. Our current honour boards are nearing their end of life, with a few boards out of space.

As we are now reaching the current boards' end of life, management is considering innovative ways to replace or upgrade them. Management is investigating the costs of replacing the boards to allow for more entries while innovative options for upgrading them are also being explored and trialled.

We are trialling one innovative solution: using large-format Television Screens to display the information on the honour board. This technology is already in use in other sporting clubs successfully. We have received a mixed reaction from our trial and have yet to confirm a possible solution.

Should we decide to upgrade the honour boards with large-format televisions, we are considering purchasing two or three 85-inch televisions to replace the current boards.

BENEFITS OF THIS POSSIBLE SOLUTION

- Updating in real-time, allowing the club to quickly add new honours or make changes as needed without the need and cost for physical modifications. This ensures the board always reflects the most current information.
- Incorporating multimedia elements such as photos, videos, and interactive features, providing viewers with a richer and more engaging experience. This can help tell a more complete story about the honours and their achievements.
- Ensuring all our records are stored electronically to ensure their longevity.
- Maintaining physical honour boards is costly, requiring ongoing materials, printing, and installation expenses.
- Can be used for other purposes during events and functions.
- Easily scaled to accommodate a growing number of honours or categories of recognition. This scalability can be particularly advantageous because we frequently add new members or awards.

Management requests that members be patient as the options for upgrading the boards are reviewed and considered. Management is looking forward to keeping the club progressive and attractive to new potential members, event managers and function planners.
